| Block | What my platform calls it | Where I found it | A real job it could do for me |
|---|---|---|---|
| **1. Connection to real data** | Connectors, built on MCP (Model Contect Protocal) | + Sign under text icon in Claude | It can go into my email and find information regarding a task I'm looking for |
| **2. Files and standing context** | Projects, project knowledge and memory | On side bar on upper left side | Keep information together for a school project with different parts |
| **3. Packaged instructions** | Skills | + Sign under text icon in claude | Repeat set of instructions such as preparing an OM |
| **4. Handing it to others** | Depends: personal (stays yours), team, enterprise (share with colleagues) | Skills sit under text icon that has a + | If im working in a team in a project, we can use the same skill so our information is accurate and claude follows the same steps |
